

Judit Orosz

GRAPHIC DESIGNER

ABOUT

I started graphic design beside my architecture studies. I am self-employed since 2008 and have experience in online and offline graphic design. In recent years, online works came into view and since 2010 I added HTML and CSS coding. Currently I am studying frontend developing. During the work process, I keep the client in the first place, executing their visualization and fitting the actual trends and technologies. I offer full-service of design, freehand and digital graphic works, corporate identities, logos.
